Dear Sir:

Upon reviewing the above-identified patent, Patentee noted a patent office error which should be corrected.

An Inventor has been omitted. Please insert:

-- Stephen Panigel, Long Island City, (NY) --.

The error was not in the application as filed by applicant; accordingly no fee is required. Enclosed please find a copy of Applicant's Request To Correct Inventorship dated February 11, 2005 and a marked up copy of page 5 of the Office Action granted on March 25, 2005.

Transmitted herewith is a proposed Certificate of Correction effecting such amendment.
Patentee respectfully solicits the granting of the requested Certificate of Correction.

STATEMENT OF STEPHEN PANIGEL PURSUANT TO 37 C.F.R. § 1.48(a)

Commissioner for Patents
P.O. Box 1450
Alexandria, VA 22313-1450

Dear Sir

I, Stephen Panigel, seeking to be being added as an inventor in this application, hereby states that:

I am an inventor of the subject matter of application No. 10/820,970. I was inadvertently omitted as a inventor upon filing of the application. This omission occurred without deceptive intent on my part.

Stephen Panigel

Date: Nov. 18, 2004

IN THE UNITED STATES PATENT AND TRADEMARK OFFICE**DECLARATION FOR PATENT APPLICATION**

As the below named inventor, I hereby declare that:

My residence, post office address and citizenship are as stated below next to my name.

I believe I am the original, first and sole inventor of the subject matter which is described and claimed and for which a patent is sought on the invention entitled:

**PROCESS FOR THE PRODUCTION OF CARDS WITH IMAGES AND RELATIVE

Art Unit: 2854

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-2 and 5-8 are rejected under 35 U.S.C. 103(a) as being unpatentable over Haghiri-Therani et al in view of Chess et al.

Haghiri-Therani et al has all the elements of the claim except for micro - perforations. Figure 3 shows the sheet having plural images 14 printed thereon. The windows are bounded by the punch lines 5. See col. 3, lines 34-37. A protective transparent cover layer is glued over the i.d. cards. See the abstract. Chess et al teaches use of microperfs 21 at col. 3, line 65 for i.d. cards. It would have been obvious to make the lines 5 of Haghiri-Therani et al of microperfs for a cleaner look as is well known in the art. Regarding claim 2, in Haghiri-Therani et al the background 3 reads on the overprinting step. See col. 3, lines 6-8. Regarding claim 2, col. 4, lines 10-12 of Haghiri-Therani et al teach punching after lamination is carried out.

Regarding claim 5, Chess et al teaches use of laser printable varnishes as a protective coating for i.d. cards. It would have been obvious to substitute the Chess et al varnish for the sheet protective layer of Haghiri-Therani et al.

Reduced thickness of the card allowing more cards in a stack is the motivation set forth at col. 1, lines 25-30 for use of the Chess et al varnish coating with the Haghiri-Therani et al i.d. card.

Regarding claim 5, Table 1 of Chess et al refers to use of an anilox roll at col. 8, line 22 to coat the varnish layer on. This would read on the well known in the art "anilox roller".

Regarding claim 6, Haghiri-Therani et al teaches in claim 1 a transparent cover "film".

Regarding claims 7-8, Chess et al teaches printing on a second backside layer of varnish in claim 7. It would have been obvious to print on the backside of the i.d. card of Haghiri-Therani et al to provide more i.d. information to keep the card size small. Printing on the Chess et al backside varnish is broadly in register with the image. Printing occurs by laser printing which reads on claim 8.

Claim 4 is rejected under 35 U.S.C. 103(a) as being unpatentable over the art cited above as applied to claim 1 above, and further in view of Adamczyk et al.

The nature of the overprint ink used in Haghiri-Therani et al to print background print 3 is not disclosed. Special effect inks, while more costly are well known in the

printing art as evidenced by Adamczyk et al. See paragraphs 24 and 25. It would have been obvious to use the background inks taught by Adamczyk et al for the background inks used by Haghiri-Therani et al where a special effect color is desired.

Claim 9 is rejected under 35 U.S.C. 103(a) as being unpatentable over Haghiri-Therani et al in view of Chess et al.

Haghiri_therani et al has all the elements of claim 9 except the punching line 13 is not identified as a microperforation. Figure 3 shows the plurality of cards with each image 14 being in a window bounded by punched perimeter 5. See col. 3, lines 34-37. The cliché 3 of fig. 2 reads on the decorative coating. See col. 3, lines 6-8. A protective transparent cover sheet is a glued thereover. See the abstract.

Chess et al teaches punched lines 21 maybe microperforations for i.d. cards. See col. 3 line 65. It would have been obvious to micro perf the lines 5 of Haghiri-Therani et al for a smoother separation and more attractive cut such micro perms are well known to create.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless —

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 10 is rejected under 35 U.S.C. 102(b) as being anticipated by Buzzell.

A multilayered protective cover shown in fig. 6 is laminated to a front surface of a card 30 bearing on image of a woman. Claim 10 calls for a writing on a back surface. A writing on the back surface of a pouch within which the laminated card 30 is laminated

Art Unit: 2854

is taught at col. 8, lines 1-4. Buzzell teaches overprinting a stripe 18 over a portion of the image layer of the photograph of the woman. This stripe 18 is beneath a protective layer 20 as shown in fig. 6.

Claim 3 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Applicant's request to add inventor Stephan Panigel stands approved.

A shortened statutory period of 3 months is set to respond.
